PhD candidate defending in June 2023

CESAER, INRAE, Institut Agro Dijon, Université de Bourgogne Franche-Comté

PROFESSIONAL EXPERIENCE

aivancity School for Technology, Business and Society 2022 -
Associate Professor - Head of the MSc. Data Management

- Management of the MSc Data Management
- Creation of the educational program
- Teaching (Graduate Level): *Business Intelligence, Datavizualisation with Python, Data Processing with Python*

French Football Federation 2019 - 2022
Teaching manager of the women's national team under 19 / under 16

- Educational support for players during international travel (Macedonia, Spain, Italy, Sweden)
- Team building off the football pitch
- Representation of the French federation to foreign delegations

Datasight 2019-2021
Founder and CEO

- Development of gamified training in Data Analytics for Business Schools
- Management of 3 interns
- *Stopped to concentrate fully on my Ph.D.*

Economic Department of the French Embassy in Belgrade 2018
Economic and financial analyst

- Monitoring and analysis of monetary and fiscal policies in Serbia and Montenegro
- Drafting notes for the Ecofin Council on the economic reform plan for the integration of Serbia and Montenegro into the EU

Orange 2017 - 2018
Public sector consultant Paris

- Strategic support for the management committee of the National Pension Fund
- Writing articles on the digital transformation of the public sector

EDUCATION

Ph.D. in Economics 2020 - (2023)
INRAE, Université de Bourgogne Franche-Comté, France

- Under the supervision of Julie Le Gallo and Marie Breuillé

M.S. in Economic Analysis and Policy - Obtained with First Class Honours 2019 - 2020
Université Paris-Nanterre, Paris

- Econometrics, Public Policy Evaluation, Microeconomics

M.A. in Business Administration

2015 - 2019

EDHEC Business School, Lille, France

- Probabilities and Statistics for Decision Making, Management, Finance, Microeconomics

M.A. in European Affairs

2017 - 2019

Sciences Po Grenoble, France

- Geopolitics, European Economy, European Law

Advanced training in mathematics and physics (Equivalent to B.S.)

2013 - 2015

Lycée Charlemagne, Paris, France

- Analysis, Probability, Algebra, Computer Science, Physics

RESEARCH INTERESTS

Political Economics, Microeconometrics, Urban Economics, Causal Inference Methods, Machine Learning for Economics

WORKING PAPERS

Party Affiliation and Public Expenditures: Close-Race Evidence from French Municipalities - September 2022

- Do elected politicians use public money differently depending on their ideology? When is partisanship most apparent during a mandate? The existing literature is mixed. Based on a regression discontinuity design, I show that political color significantly impacts public spending in French municipalities. Moreover, partisanship mainly influences public expenditures in the last two years of the mandate, thus following a political cycle. Focusing on city size heterogeneity, I show that left-wing mayors invest substantially more than their right-wing counterparts in both small and large municipalities but in different spending areas. In contrast, differences in current expenditures concern only small municipalities. These findings highlight that city size and density may explain the conflicting results in the literature.

Racial and Gender Discriminations: Large-scale Evidence from French Local Elections - December 2022

- Do all citizens have an equal opportunity to be elected? Using an onomastic classifier and gender data of candidates for municipal elections in France, I causally estimate the effects of discrimination with a doubly robust AIPTW estimator and causal forests. I find that women lose about two percentage points compared to a male candidate, while people of Arab-Muslim origin lose about ten percentage points compared to a non-Arab candidate. These results highlight the strong presence of taste-based discrimination.

Airbnb in the City and the Country Challenged by Covid-19 - November 2022

with Marie Brevillé, Camille Grivault, Julie le Gallo, Yuheng Ling

- We analyze the determinants of the supply of short-term rentals through the activity of the Airbnb platform in metropolitan France. Through partitioning the territory in cities' attraction areas, we highlight a substantial spatial heterogeneity, with very attractive centers, while secondary poles are not

in demand. The Covid-19 crisis caused listings to drop between 10.3% and 13.5%, although the effects varied depending on the type of area. It has significantly affected central municipalities, main hubs, and municipalities outside city attraction areas but has not significantly impacted secondary centers and surrounding areas.

RESEARCH IN PROGRESS

Industrial Accidents and Housing Market: Evidence from the explosion of the Lubrizol Plant in France

with Gabriel Loumeau

- Started in January 2022

How is Airbnb changing local ecosystems? Evidence from France

with Marie Breuillé, Camille Grivault, Julie le Gallo

- Started in September 2021

CONFERENCES AND WORKSHOPS

- The Economics of Airbnb - Nice, France (December 2022)
- Annual Conference of the European Political Science Association - Prague, Czech Republic (June 2022)
- ZEW Public Finance Conference - Mannheim, Germany (April 2022)
- TEPP Annual Conference, Paris, France (November 2021)
- Annual Conference ASRDLF - Avignon, France (September 2021)
- GTI CESAER, Dijon France (September 2021, October 2022)

TEACHING

SciencesPo Paris

Spring 2021, Spring 2022

- Statistics for social sciences - Undergraduate level - 2 × 24 hours

Institut Agro Dijon

Fall 2021, Fall 2022

- Advanced statistics – Graduate level - 24 hours
- Competition Policy in Practice - Graduate level - 4 hours

University of Burgundy

Spring 2021

- Econometrics - Undergraduate level - 30 hours

RESEARCH GRANTS

Research project funded by the French Ministry of Territorial Cohesion, co-directed by Julie le Gallo and Marie Breuillé

- How is the collaborative economy platform Airbnb changing the housing market? - 2021

TECHNICAL AND LINGUISTIC SKILLS

R	Advanced	French	Native language
Python	Advanced	Kabyle	Native language
SQL	Advanced	English	C2 (Bilingual)
Stata	Advanced	German	B1 (Intermediate)
Tableau software	Advanced		
Latex	Advanced		
Gis Tools	Intermediate
